

LABORATORY REPORT

NAME : MR.BC0129 REFERRED BY : SELF VISIT NO : VAMP26148083
AGE : 40Y 0M 0D ZERO TARIFF CLIENT CODE COLLECTED ON : 21-04-2026 10:00
GENDER : Male LAB MR# : AAMP01479362 RECEIVED ON : 21-04-2026 19:51
OP / IP / DG # : APPROVED ON : 22-04-2026 17:59
REPORT STATUS : Final Report

Test Name	Result	Biological Ref. Interval	Unit
-----------	--------	--------------------------	------

BIOCHEMISTRY

Haptoglobin (Serum)

Haptoglobin 124.00 30.00-200.00 mg/dL
Immunoturbidimetry

Interpretation:

The main function of Haptoglobin is to combine with the hemoglobin released by lysis of the red cells to preserve body iron and protein stores. Serum Haptoglobin rises in response to stress, infection, acute inflammation and tissue necrosis. After a hemolytic episode, Haptoglobin concentration falls as the complexes with hemoglobin are cleared from circulation. This test is also useful for serially monitoring patients who have a slow but steady rate of red cell breakdown such as by mechanical heart valves, hemoglobinopathies and exercise associated trauma.

Increased levels - Acute inflammation, Protein losing enteropathy, Protein losing nephropathy, Tissue necrosis, Stress

Decreased levels - Congenital deficiency, Hemolytic transfusion reaction, Thermal burns, Autoimmune hemolytic anemia

Sanjeeta

Dr. Sanjeeta
MBBS, MD (Biochemistry)
Consultant Biochemist

Disclaimer:

1. All results released pertain to the specimen as received by the lab for testing and under the assumption that the patient indicated or identified on the bill/test requisition form is the owner of the specimen.
2. Clinical details and consent forms, especially in Genetic testing, histopathology, as well as wherever applicable, are mandatory to be accompanied with the test requisition form. The non-availability of such information may lead to delay in reporting as well as misinterpretation of test results. The lab will not be responsible for any such delays or misinterpretations thereof.
3. Test results are dependent on the quality of the sample received by the lab. In case the samples are preprocessed elsewhere (e.g., paraffin blocks), results may be compromised.
4. Tests are performed as per the schedule given in the test listing and in any unforeseen circumstances, report delivery may be affected.
5. Test results may show inter-laboratory as well as intra-laboratory variations as per the acceptable norms.
6. Genetic reports as well as reports of other tests should be correlated with clinical details and other available test reports by a qualified medical practitioner. Genetic counselling is advised in genetic test reports by a qualified genetic counsellor, medical practitioner or both.
7. Samples will be discarded post processing after a specified period as per the laboratory's retention policy. Kindly get in touch with the lab for more information.
8. If accidental damage, loss, or destruction of the specimen is not attributable to any direct or negligent act or omission on the part of Ampath Labs or its employees, Ampath shall in no event be liable. Ampath lab's liability for a lack of services, or
