

LABORATORY REPORT

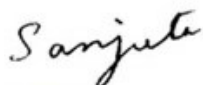

NAME : MR.BC0567	REFERRED BY : SELF	VISIT NO : VAMP26148018
AGE : 40Y 0M 0D	ZERO TARIFF CLIENT CODE	COLLECTED ON : 21-04-2026 10:00
GENDER : Male	LAB MR# : AAMP01479297	RECEIVED ON : 21-04-2026 19:51
OP / IP / DG # :		APPROVED ON : 22-04-2026 17:48
		REPORT STATUS : Final Report

Test Name	Result	Biological Ref. Interval	Unit
BIOCHEMISTRY			
C-Peptide Stimulation by Glucagon (Serum)			
C- Peptide sample 0 <i>ECLIA</i>	2.50	1.1-4.4	ng/mL
C- Peptide sample 1	4		ng/mL
C- Peptide sample 2	3		ng/mL
C-Peptide sample 3	3.00		ng/mL

Interpretation:

C-peptide is a single chain 31-amino acid polypeptide connecting the insulin A chain with the B chain in the proinsulin molecule. Measurements of C-peptide, insulin and glucose are used as an aid in the differential diagnosis of hypoglycemia (factitious hypoglycemia and hypoglycemia caused by hyperinsulinism) to ensure an appropriate management and therapy of the patients. It aids in the assessment of a residual β -cell function in the early stages of type 1 diabetes mellitus and for the differential diagnosis of latent autoimmune diabetes of adults (LADA) and type 2 diabetes. It also used to assess the success of islet transplantation and for monitoring after pancreatectomy. Elevated C-peptide levels may also result from renal insufficiency and obesity.

Dr. Sanjeeta
MBBS,MD (Biochemistry)
Consultant Biochemist

Disclaimer:

1. All results released pertain to the specimen as received by the lab for testing and under the assumption that the patient indicated or identified on the bill/test requisition form is the owner of the specimen.
2. Clinical details and consent forms, especially in Genetic testing, histopathology, as well as wherever applicable, are mandatory to be accompanied with the test requisition form. The non-availability of such information may lead to delay in reporting as well as misinterpretation of test results. The lab will not be responsible for any such delays or misinterpretations thereof.
3. Test results are dependent on the quality of the sample received by the lab. In case the samples are preprocessed elsewhere (e.g., paraffin blocks), results may be compromised.
4. Tests are performed as per the schedule given in the test listing and in any unforeseen circumstances, report delivery may be affected.
5. Test results may show inter-laboratory as well as intra-laboratory variations as per the acceptable norms.
6. Genetic reports as well as reports of other tests should be correlated with clinical details and other available test reports by a qualified medical practitioner. Genetic counselling is advised in genetic test reports by a qualified genetic counsellor, medical practitioner or both.
