Interpretation:

Enzyme immunoassay for the quantitative determination of chromogranin A in serum. the determination of the chromogranin A helps in the detection of neuroendocrine tumors and is used to assess the course of the cancer treatment .

Chromogranin A is and acid glycoprotein present in the secretory dense core granules of most neuroendocrine cells.

Chromogranin A is widely expressed throughout the neuroendocrine system and serves as a general biomarker for a wide variety of neuroendocrine tumors.
