SEROLOGY AND IMMUNOLOGY

Anti ds-DNA - ELISA (Serum)

Anti ds-DNA - ELISA ELISA	12.36	<100.0 : Negative ≥100.0 : Positive	IU/ml
------------------------------	-------	--	-------

Interpretation:

Anti double stranded DNA (ds DNA) antibodies are specific for SLE observed in 40-90% of these patients with active disease. American Rheumatoid arthritis association considers the presence of ds -DNA antibody as a diagnostic criteria for SLE. These antibodies are directly involved in the disease process being deposited as DNA / Anti DNA immune complexes. This test is used for diagnosis and monitoring of SLE with high levels being associated with exacerbation of disease activity and lower levels correlating with remission. They may be raised in patients with Discoid lupus erythematosus. All SLE patients may not show elevated ds -DNA antibodies especially those at the peak of SLE exacerbation. In some cases the level may remain elevated even during the remission phase of the disease.

Dr. G. Amitha
MBBS, MD (MICROBIOLOGY)
Consultant Microbiologist

Disclaimer:

1. All results released pertain to the specimen as received by the lab for testing and under the assumption that the patient indicated or identified on the bill/test requisition form is the owner of the specimen.
2. Clinical details and consent forms, especially in Genetic testing, histopathology, as well as wherever applicable, are mandatory to be accompanied with the test requisition form. The non-availability of such information may lead to delay in reporting as well as misinterpretation of test results. The lab will not be responsible for any such delays or misinterpretations thereof.
3. Test results are dependent on the quality of the sample received by the lab. In case the samples are preprocessed elsewhere (e.g., paraffin blocks), results may be compromised.
4. Tests are performed as per the schedule given in the test listing and in any unforeseen circumstances, report delivery may be affected.
5. Test results may show inter-laboratory as well as intra-laboratory variations as per the acceptable norms.
6. Genetic reports as well as reports of other tests should be correlated with clinical details and other available test reports by a qualified medical practitioner. Genetic counselling is advised in genetic test reports by a qualified genetic counsellor, medical practitioner or both.
