

LABORATORY REPORT

NAME : MR.SI0011	REFERRED BY : SELF	VISIT NO : VAMP26147887
AGE : 40Y 0M 0D	ZERO TARIFF CLIENT CODE	COLLECTED ON : 21-04-2026 10:00
GENDER : Male	LAB MR# : AAMP01479166	RECEIVED ON : 21-04-2026 18:08
OP / IP / DG # :		APPROVED ON : 22-04-2026 12:50
		REPORT STATUS : Final Report

Test Name	Result	Biological Ref. Interval	Unit
-----------	--------	--------------------------	------

SEROLOGY AND IMMUNOLOGY

ANCA (Anti Neutrophil Cytoplasmic Antibody) - IFA with reflex titers (Serum)

ANCA Result	Negative	Negative
<i>Immuno fluorescence Microscopy</i>		
c-ANCA	Negative	Negative
p-ANCA	Negative	Negative

Interpretation:

IgG reactivity	Interpretation
No Fluorescence at 1:10	Negative. (No antibodies against cell nuclei detectable in the given sample).
Fluorescence at 1:10	Positive

Note

- 1.Autoimmune reactivities are not by themselves diagnostic, but must be correlated with other laboratory & clinical findings.
2. Test conducted on Serum.

Demonstration of ANCA is about 95% sensitive and 90% specific for Wegener's granulomatosis and Microscopic polyangiitis. Necrotising vasculitis are a group of disorders with varied clinical presentations which include Wegener's granulomatosis, Polyarteritis nodosa, Churg Strauss syndrome & Idiopathic crescentic glomerulonephritis. ANCA positivity presents in two types of patterns, c-ANCA (Proteinase 3 / PR3) & p-ANCA (Myeloperoxidase / MPO).

Pattern	Antigen	Clinical Association
c-ANCA	PR3	* Wegener's granulomatosis (90%)
		* Microscopic polyangiitis (50%)
		* Churg Strauss syndrome (30%)
		* Systemic sclerosis (20%)
		* Rheumatoid arthritis (17%)
		* Acute reactive arthritis (4%)
		* Chronic reactive arthritis (2%)
		* Crescentic glomerulonephritis
		* Necrotising crescentic

MBBS, MD (MICROBIOLOGY)
Consultant Microbiologist

Disclaimer:

- All results released pertain to the specimen as received by the lab for testing and under the assumption that the patient indicated or identified on the bill/test requisition form is the owner of the specimen.
- Clinical details and consent forms, especially in Genetic testing, histopathology, as well as wherever applicable, are mandatory to be accompanied with the test requisition form. The non-availability of such information may lead to delay in reporting as well as misinterpretation of test results. The lab will not be responsible for any such delays or misinterpretations thereof.
- Test results are dependent on the quality of the sample received by the lab. In case the samples are preprocessed elsewhere (e.g., paraffin blocks), results may be compromised.
- Tests are performed as per the schedule given in the test listing and in any unforeseen circumstances, report delivery may be affected.
- Test results may show inter-laboratory as well as intra-laboratory variations as per the acceptable norms.
- Genetic reports as well as reports of other tests should be correlated with clinical details and other available test reports by a qualified medical practitioner. Genetic counselling is advised in genetic test reports by a qualified genetic counsellor, medical practitioner or both.
- Samples will be discarded post processing after a specified period as per the laboratory's retention policy. Kindly get in touch with the lab for more information.
- If accidental damage, loss, or destruction of the specimen is not attributable to any direct or negligent act or omission on
