AGE	: 40Y 0M 0D	ZERO TARIFF CLIENT CODE		COLLECTED ON	: 21-04-2026 10:00
GENDER	: Male	LAB MR#	: AAMP01479197	RECEIVED ON	: 21-04-2026 18:08
OP / IP / DG #	:			APPROVED ON	: 22-04-2026 20:00
				REPORT STATUS	: Final Report

Test Name	Result	Biological Ref. Interval	Unit
-----------	--------	--------------------------	------

SEROLOGY AND IMMUNOLOGY

Anti Nuclear Antibody (ANA) - Quantitative ELISA (Serum)

Anti Nuclear Antibody (ANA) ELISA	3.52	<20 : Negative 20-60 : Moderate Positive >60 : Strong Positive	Units
--------------------------------------	------	--	-------

Interpretation:

The ANA test is an in vitro assay for human autoantibodies of the IgG class against ten different antigens: chromatin (dsDNA & histones), SmRNP, SS-A, SS-B, Scl-70, Jo-1, Centromere, PCNA, mitochondria (M-2) and Ribosomal-P protein. In the case of positive samples, specific IgG (also IgA and IgM) antibodies will bind to the antigens. A negative result should not be used as a sole criterion to rule out systemic rheumatic disease or other autoimmune disease, but must be taken in relation to other clinical observations and diagnostic tests.

ELISA evaluations may be supplemented with Immunofluorescent or Immunoblot assays which can provide specific information to autoimmune disease correlation.

Dr. G. Amitha  
MBBS, MD (MICROBIOLOGY)  
Consultant Microbiologist

Disclaimer:

1. All results released pertain to the specimen as received by the lab for testing and under the assumption that the patient indicated or identified on the bill/test requisition form is the owner of the specimen.
2. Clinical details and consent forms, especially in Genetic testing, histopathology, as well as wherever applicable, are mandatory to be accompanied with the test requisition form. The non-availability of such information may lead to delay in reporting as well as misinterpretation of test results. The lab will not be responsible for any such delays or misinterpretations thereof.
3. Test results are dependent on the quality of the sample received by the lab. In case the samples are preprocessed elsewhere (e.g., paraffin blocks), results may be compromised.
4. Tests are performed as per the schedule given in the test listing and in any unforeseen circumstances, report delivery may be affected.
5. Test results may show inter-laboratory as well as intra-laboratory variations as per the acceptable norms.
6. Genetic reports as well as reports of other tests should be correlated with clinical details and other available test reports by a qualified medical practitioner. Genetic counselling is advised in genetic test reports by a qualified genetic counsellor, medical practitioner or both.
7. Samples will be discarded post processing after a specified period as per the laboratory's retention policy. Kindly get in touch with the lab for more information.
