

LABORATORY REPORT

NAME : MR.SI0345 REFERRED BY : SELF VISIT NO : VAMP26147904
AGE : 40Y 0M 0D ZERO TARIFF CLIENT CODE COLLECTED ON : 21-04-2026 10:00
GENDER : Male LAB MR# : AAMP01479183 RECEIVED ON : 21-04-2026 18:08
OP / IP / DG # : APPROVED ON : 22-04-2026 20:10
REPORT STATUS : Final Report

Test Name	Result	Biological Ref. Interval	Unit
-----------	--------	--------------------------	------

SEROLOGY AND IMMUNOLOGY

Anti Gliadin IgA Antibodies (Serum)

Anti Gliadin IgA Antibodies 3.65 Negative: < 20 Weak Positive: Units
Enzyme Immunoassay 20-30 Strong Positive: >30

Interpretation:

Interpretation:
Gliadin (deamidated,DGP) is a fraction of gluten, which is a protein component found in wheatmeal and other cereals
In gluten sensitive enteropathy/celiac disease, cereal ingestion brings about intestinal malabsorption and diarrhoea
High anti gliadin IgA and/or IgG levels are therefore used for screening or monitoring patients with Celiac disease
Limitations:
High anti- gliadin titres may be found in other gastrointestinal diseases such as Crohn`s disease, ulcerative colitis and
esophagitis. Low levels of anti- gliadin antibodies have been found in several cases of celiac disease due to a selective IgA
deficiency Values should be interpreted in conjunction with associated tests viz. tissue trans glutaminase and endomysial antibody

Dr. G. Amitha
MBBS, MD (MICROBIOLOGY)
Consultant Microbiologist

Disclaimer:
1. All results released pertain to the specimen as received by the lab for testing and under the assumption that the patient indicated or identified on the bill/test requisition form is the owner of the specimen.
2. Clinical details and consent forms, especially in Genetic testing, histopathology, as well as wherever applicable, are mandatory to be accompanied with the test requisition form. The non-availability of such information may lead to delay in reporting as well as misinterpretation of test results. The lab will not be responsible for any such delays or misinterpretations thereof.
3. Test results are dependent on the quality of the sample received by the lab. In case the samples are preprocessed elsewhere (e.g., paraffin blocks), results may be compromised.
4. Tests are performed as per the schedule given in the test listing and in any unforeseen circumstances, report delivery may be affected.
5. Test results may show inter-laboratory as well as intra-laboratory variations as per the acceptable norms.
6. Genetic reports as well as reports of other tests should be correlated with clinical details and other available test reports by a qualified medical practitioner. Genetic counselling is advised in genetic test reports by a qualified genetic counsellor, medical practitioner or both.
7. Samples will be discarded post processing after a specified period as per the laboratory's retention policy. Kindly get in touch with the lab for more information.
