

LABORATORY REPORT

NAME : MR.SI0396 REFERRED BY : SELF VISIT NO : VAMP26148043
AGE : 40Y 0M 0D ZERO TARIFF CLIENT CODE COLLECTED ON : 21-04-2026 10:00
GENDER : Male LAB MR# : AAMP01479322 RECEIVED ON : 21-04-2026 18:11
OP / IP / DG # : APPROVED ON : 22-04-2026 13:52
REPORT STATUS : Final Report

Test Name	Result	Biological Ref. Interval	Unit
-----------	--------	--------------------------	------

SEROLOGY AND IMMUNOLOGY

Epstein Barr Virus Viral Capsid Antigen IgM Antibodies, EBV (VCA) (Infectious Mononucleosis) (Serum)

EBV Viral Capsid Antigen IgM Antibodies, EBV (VCA) (Infectious Mononucleosis) ELISA	0.03	< 0.8:Negative 0.8-1.2: Equivocal >1.2: Positive	Index
--	------	--	-------

Interpretation:

An infectious mononucleosis similar syndrome can be caused by cytomegalovirus, toxoplasmosis and other viral infections. Therefore differential diagnosis is of major importance. Serological tests are very useful for the detection of anti-EBV IgG and IgM antibodies especially when heterophil antibodies are absent. Related to fresh infections, IgM antibodies against Viral Capsid Antigen(VCA) and Early Antigen(EA) are determined by Immunofluorescence or ELISA. VCA IgG antibodies occur early in disease, reach the highest titers within 2 to 4 weeks and persist for many years probably for life. VCA IgM antibodies occur at the beginning of the disease but decrease or even disappear within a few months.

Dr. G. Amitha
MBBS, MD (MICROBIOLOGY)
Consultant Microbiologist

Disclaimer:

1. All results released pertain to the specimen as received by the lab for testing and under the assumption that the patient indicated or identified on the bill/test requisition form is the owner of the specimen.
2. Clinical details and consent forms, especially in Genetic testing, histopathology, as well as wherever applicable, are mandatory to be accompanied with the test requisition form. The non-availability of such information may lead to delay in reporting as well as misinterpretation of test results. The lab will not be responsible for any such delays or misinterpretations thereof.
3. Test results are dependent on the quality of the sample received by the lab. In case the samples are preprocessed elsewhere (e.g., paraffin blocks), results may be compromised.
4. Tests are performed as per the schedule given in the test listing and in any unforeseen circumstances, report delivery may be affected.
5. Test results may show inter-laboratory as well as intra-laboratory variations as per the acceptable norms.
6. Genetic reports as well as reports of other tests should be correlated with clinical details and other available test reports by a qualified medical practitioner. Genetic counselling is advised in genetic test reports by a qualified genetic counsellor, medical practitioner or both.
7. Samples will be discarded post processing after a specified period as per the laboratory's retention policy. Kindly get in touch with the lab for more information.
8. If accidental damage, loss, or destruction of the specimen is not attributable to any direct or negligent act or omission on the part of Ampath Labs or its employees, Ampath shall in no event be liable. Ampath lab's liability for a lack of services, or
