SEROLOGY AND IMMUNOLOGY

Hepatitis B core Antibody IgM (Anti HBc - IgM) (Serum)

Anti HBc - IgM 0.03 Negative : <1.00 Index Value
ELISA Positive : >1.00

Interpretation:

A positive result indicates recent acute hepatitis B infection. A negative test result does not exclude the possibility of exposure to hepatitis B virus. Anti- HBc IgM is the earliest specific antibody appearing usually within 2 weeks after HBsAg. It is found in high titres for a short period during the acute phase that covers the serologic window and declines to low levels during recovery. It may be detectable upto 6 months. Results from immunosuppressed patients should be interpreted with caution. Testing additional HBV markers is recommended for the final diagnosis of the infection, in those very particular cases.

Dr. G. Amitha
MBBS, MD (MICROBIOLOGY)
Consultant Microbiologist

Disclaimer:

1. All results released pertain to the specimen as received by the lab for testing and under the assumption that the patient indicated or identified on the bill/test requisition form is the owner of the specimen.
2. Clinical details and consent forms, especially in Genetic testing, histopathology, as well as wherever applicable, are mandatory to be accompanied with the test requisition form. The non-availability of such information may lead to delay in reporting as well as misinterpretation of test results. The lab will not be responsible for any such delays or misinterpretations thereof.
3. Test results are dependent on the quality of the sample received by the lab. In case the samples are preprocessed elsewhere (e.g., paraffin blocks), results may be compromised.
4. Tests are performed as per the schedule given in the test listing and in any unforeseen circumstances, report delivery may be affected.
5. Test results may show inter-laboratory as well as intra-laboratory variations as per the acceptable norms.
6. Genetic reports as well as reports of other tests should be correlated with clinical details and other available test reports by a qualified medical practitioner. Genetic counselling is advised in genetic test reports by a qualified genetic counsellor, medical practitioner or both.
7. Samples will be discarded post processing after a specified period as per the laboratory's retention policy. Kindly get in touch with the lab for more information.
8. If accidental damage, loss, or destruction of the specimen is not attributable to any direct or negligent act or omission on the part of Ampath Labs or its employees, Ampath shall in no event be liable. Ampath lab's liability for a lack of services, or other mistakes and omissions, shall be restricted to the amount of the patient's payment for the pertinent laboratory services.
