NAME : MR.SI0041 REFERRED BY : SELF VISIT NO : VAMP26148115
AGE : 40Y 0M 0D ZERO TARIFF CLIENT CODE COLLECTED ON : 21-04-2026 10:00
GENDER : Male LAB MR# : AAMP01479394 RECEIVED ON : 21-04-2026 19:52
OP / IP / DG # : APPROVED ON : 21-04-2026 20:55
REPORT STATUS : Final Report

Test Name	Result	Biological Ref. Interval	Unit
-----------	--------	--------------------------	------

SEROLOGY AND IMMUNOLOGY

Herpes Simplex Virus (HSV) Types 1+2 IgG and IgM Antibodies (Serum)

HSV 1+2 IgG CLIA	0.04	Negative : < 0.9 Borderline : 0.9 – 1.1 Positive : > 1.1	Index
HSV 1 + 2 IgM CLIA	0.06	Negative : < 0.9 Borderline : 0.9 – 1.1 Positive : > 1.1	Index

Interpretation:

Herpes simplex is a disease which causes the formation of blisters on the skin and mucous membranes, is prevalent world-wide and normally proceeds blandly. Complications result when internal organs are also affected and necrotize. Herpes simplex 1 viruses prefer the area of the mouth and nose, herpes simplex 2 viruses the genitals. Provocable relapses are typical. Antibodies against HSV-2 can be detected in the serum of nearly all patients after the illness has taken its course. More the 90% of the population are infected with HSV-1, whereas antibodies against HSV-2 can only be found in 7 – 20 %. However, the antibodies are not able to prevent a relapse or re-infection.

Dr. G. Amitha
MBBS, MD (MICROBIOLOGY)
Consultant Microbiologist

Disclaimer:
1. All results released pertain to the specimen as received by the lab for testing and under the assumption that the patient indicated or identified on the bill/test requisition form is the owner of the specimen.
2. Clinical details and consent forms, especially in Genetic testing, histopathology, as well as wherever applicable, are mandatory to be accompanied with the test requisition form. The non-availability of such information may lead to delay in reporting as well as misinterpretation of test results. The lab will not be responsible for any such delays or misinterpretations thereof.
3. Test results are dependent on the quality of the sample received by the lab. In case the samples are preprocessed elsewhere (e.g., paraffin blocks), results may be compromised.
4. Tests are performed as per the schedule given in the test listing and in any unforeseen circumstances, report delivery may be affected.
5. Test results may show inter-laboratory as well as intra-laboratory variations as per the acceptable norms.
6. Genetic reports as well as reports of other tests should be correlated with clinical details and other available test reports by a qualified medical practitioner. Genetic counselling is advised in genetic test reports by a qualified genetic counsellor, medical practitioner or both.
7. Samples will be discarded post processing after a specified period as per the laboratory's retention policy. Kindly get in
